If I Were A Mayor...

93

If I were a mayor I would make Valdosta the best town in America. Not that John Gayle hasn't done that already. I would first deal with the education. I would make a better education system. I would open up tutoring places around Valdosta so any child in need of a little more help could be tutored if needed. The price the sessions would be \$5.00 per hour. That's not bad at all. I would also just tell the teachers to make sure their students understand all the material they are going over.

89

If I were a mayor I would also keep Valdosta a safe place. Keeping a place a safe place is the "key to success". If I were a mayor I would hire security guards to guard neighborhoods and places that might need a little more guidance. I would also create school safety. I would take care of transportation safety and general safety. I would also recommend everyone having an alarm system in their house including a fire alarm. Valdosta is already a safe place, but the safer the better.

83

If I were a mayor I would make the city a better place by creating less pollution. I would do that by getting buses, taxis, and uber drivers. That would also help the adults of elders who can't drive get to their destination. I would also require everyone to get vaccinations to not catch any diseases or get sick. I really wouldn't know how to be a mayor at this age, but these tips could help the next or present mayor of Valdosta.
