IF I WERE MAYOR

If I were Mayor, I would make sure everyone is treated fairly; provide more activities for the children; better education for students; and create more jobs for the community.

Many people in Valdosta do not have money to care for their family. They do not receive the same treatment as families with money. I would ask businesses to help support these families by inviting them as guest to activities, such as City Festivals. I would ask the community to work together to help others that do not have money to go places.

I would build a recreation and Learning Center for disadvantage children. This center will have teachers to help students with their homework. It would be a great place for children of all ages to come to play sports, learn to use computers, and learn how to play musical instruments.

I would ensure quality education for students. I would assist the School Board members on creating good ideas for learning in the classroom. I would insist the school get the best teachers to help the students learn. I would ask the School Board to pay teachers a good salary to stay at the school. I believe quality teachers will help students learn. A good teacher will not let students disrupt the class. There are students that have talents and good teachers can help those students use their talents.

Finally, I would create more jobs for the community. I would ask companies to bring jobs to the community for needed families. I believe jobs will help the community to grow and allow families to buy food and clothes. I would make sure jobs are giving out fairly to everyone who wants to work. I know there are people who are willing to work, but do not get a fair chance to work. I will bring as many businesses into the city so everyone can have a job.

In closing, as Mayor, I want to help my city grow and for everyone to have the opportunity to live a happy life.
