## If i were a mayor

If I were the mayor of Valdosta, GA I would work on my many problems. First, I would work to ensure our town's enjoyment. I would strive to create a prosperous economy. I would also construct more efficient roads, so our community has less potholes. Better roads would help tourism and draw more businesses and industry to our wonderful town. I would also do the best of my ability to fix the small problems that could turn into large problems. These problems would be similar to something such as littering on the side of a road. They happen way too often, so we should work to fix them. By putting more recycling containers around the city, we could alleviate much of the trash thrown along the roads. Educating the public about going green will help our environment for future generations. I would work on budgets for city departments, making sure that schools had enough funding for extracurricular activities. Our schools would be able to support sports, arts, and entertainment. I would make sure we have significant budget for stopping crime...in schools and community. I would budget for more staff to provide faster ambulance responses, so we could take care of injured people swiftly and save money. In conclusion, as mayor I would do the best of my ability to solve community problems, and be someone people could always go to. Thank you Mayor Gayle for doing an outstanding job!
